DETAILED ACTION

Allowable Subject Matter

Claims 1-9 are allowable.

The following is an examiner's statement of reasons for allowance: Upon conclusion of a comprehensive search of the pertinent prior art, the Office indicates that the claims are allowable. Patentability exists, at least in part, with the PCB mounted in the case and having a fuse bracket mounted thereon aligned with a fuse access hole in the case, and ,in addition, a wire connector mounted thereon aligned with a wire connector access hole in the case, as well as, input and output terminals mounted thereon and aligned with the two terminal holes in the case. Minelli US Patent 6778388, Getter US Patents 4872102 and 5170336, Shoquist US Patent 5297025, Liautaud et al US Patent and Donahoe et al US Patent 5808869 are all cited as disclosing elements of the claimed invention to include embodiments of an upright heat sink having a top and a case mounted on the top of the heat sink and a printed circuit board mounted vertically on the heat sink within the case. The references, however, are silent with respect to disclosing all the elements in the manner as claimed by the Applicant. Nowhere in the prior art is there a combination that teaches or suggests all the limitations in the manner as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
